DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art teaches the use of solid-state image sensors with an image pickup section, a feeding section and having photosensitive cells and transfer electrodes. However, the prior art does not teach or fairly suggest the detailed structural layout of the claimed invention including the layout in which each of the claimed photosensitive cells is assigned four vertical transfer registers grouped in pairs in the vertical direction and formed on both sides of the cell in the horizontal direction, where adjacent pairs are shifted in position are joined. Therefore, the claims are allowed over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
